

Do implements and attachments sold and used in the USA fit on the different models of Knekt e-Tractors?

The Answer is YES.

The Reason is the 3-point hitch became worldwide standard in the 1960s, when manufacturers agreed on the three-point hitch as the one standard, interchangeable, full-featured system to hitch implements to tractors.

SP 55 HP electric Knekt 4WD tractor and matching farm equipment 6-10 foot disks and other tillage equipment

Planters, plows 1-2-3 bottom and 1- 2 row mulch transplanters for 40 HP or less

2-4 row cultivators from KMC, JD, International, Hinker,

JD 494, 1750, 7000, planters

US small farm twin row potato planter

Covington 2x2 twin and 4 row planters

US Small Farm potato planter, digger, harvester

Allis 66, 72, and 90 combines PTO

International 76,80,and 82, 403 grain combines

JD 12a, 25, 30, 65 and

6601 PTO combines

2-3 row corn pickers and shellers

Low Horsepower 4x5 Hay equipment for electric Tractors

Sprayers and 3pt boom sprayers

Push or pull Produce Harvesters with electric Tractors

Forage choppers

Low Horsepower PTO for TMR Jaylor 5120, 5275

Low horsepower PTO grinder mixers

Low Horsepower PTO and drawn equipment works for electric Tractors
