

BatteryBarns©

can be ordered in every size of shipping container as needed for the individual power storage. Customers can choose the colors. We recommend light colors in warm climates and dark colors in cold climates. Mixed climates? A nice beige would be lovely.

Depending on the climate zone the **et-sun** BatteryBarns© will be insulated with, closed-cell, condensation-controlled Expanded Polystyrene Panels on the ceiling or all walls and floors.

On the ceiling are moisture proof LED Lights installed with activation switch.

An Entry Foyer Partition with door and through-the-wall Air Conditioner. This dual function cool and heat air conditioner features an easy-to-remove and easy-to-clean filter with a change reminder. It also has a 24-hour on and off timer that cools on a schedule for added convenience.

CoolBot Pro Walk-in Cooler Controller for Air Conditioners (Wi-Fi Enabled), cooling from 55F down to 45F, remotely adjust, monitor and receive critical alerts. 65F down to 45F to increase battery performance.

A cellular temperature monitoring device alerts if there is a rise or fall in temperature, high levels of humidity and even light or sound changes.

On 2 outside walls, we install an aluminum plate 8 x 10 ft. with logos.

On the roof we install a racking system and solar panels in the length of the container, to run the climate control system that has its own backup system

et-sun BatteryBarns© are ready to install your need of batteries and inverters:
